MATHEMATICS

A. Architecture has in the past done great things for geometry. Together with the need to measure the land they lived on, it was people's need to build their buildings that caused them to first investigate the theory of form and shape. But today, 4500 years after the great pyramids were built in Egypt,

- (I) Is architecture math? (II) What can mathematics do for architecture?
 (III) What kind of math used in architecture? (IV) Do architects get paid well?

Investigate and write an article about above queries (not exceeding 100 words).

Also prepare a simple model or drawing layout of a flyover with ring roads that can be constructed in Ballabgarh market area that helps in reducing the traffic congestion which also connects with sectors around it, metro station and bypass road. Also mention the rough estimated cost and expected time duration for construction.
